Notes:

- *1 On some PCs, "Master Volume" and "Voice-Over Recording Room" in the edit window may not operate.
- *2 During the creating thumbnail images, video playback may not be normal. Please wait until all thumbnail images in the PC screen are displayed.
- *3 While you are using software, "The color scheme has been changed..." message may appear. However, continue to use, this will not cause a problem.
- *4 When you start the software, "User Account Control" window may be opened. Please select "Allow", then you can use it.
- *5 On some PCs, "Master Volume" and "Voice-Over Recording Room" and "Capture" button in the edit window may not operate.
- *6 It may take long time (over 1minute) for device recognition. We recommend to use conventional USB Card Reader.
- *7 On some PCs with AGERE's 1394 controller, device recognition may fail.
