Picture Performance

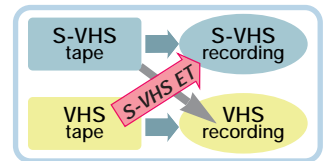

Super VHS and "Super VHS ET" Technology for +60% Better Picture Quality (GR-SXM37)

S-VHS QUALITY ON VHS TAPE

As a format, Super VHS offers more than 400 lines of horizontal resolution. That's up to 60% more resolution than ordinary video – great for large-screen viewing and ideal for master tapes. For those really important recordings that you plan to keep, using S-VHS cassettes will assure the highest possible quality now and in the future. And with the Super VHS ET function, you can enjoy high resolution more conveniently because it lets you record Super VHS images on standard Compact VHS cassettes.*

*JVC's HG (High Grade) tapes recommended. For best reproduction, SP mode recording with camcorder playback is recommended as some noise may appear with EP recorded tapes or when played back on a VCR. There are some S-VHS VCR models by JVC and other manufacturers with which playback of an S-VHS ET recorded tape is not possible.

Other Features

- EP (Extended Play) Mode records up to 120 minutes on a single cassette
- Built-in Battery Charger
- S-VHS Output (GR-SXM37)
