For use with Macintosh

Production manual for creating dramatic movies.

~Data storage and data editing sections~

I'll be the director!

ENGLISH

Creating dramatic memories

This software program ensures that the pictures you took with your Everio will remain dramatic whenever you view them, and gives you the chance to make movies with emotions that cannot be found in any script. The role of director will, of course, fall to you!

Creating a dramatic movie

1 Taking the movie

2 Data storage section I — Storing your movie on computer

3 Data storage section II — Saving your movie to DVD

4 Editing section — Creating your story

5 Storing edited works section — Saving your edited movie to DVD
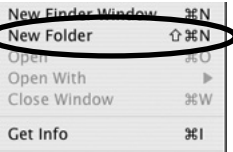

6 Watching the movie

●Data storage section I Storing your movie on computer

Any movies you take should be quickly copied to your computer. Creating room in the Everio's hard disk clears up space for you to store your next great movie.

Details	Method
Storing your movie on computer	**❶** First, create a folder* on your computer to hold your new movie. *To create a new folder, select "New Folder" from the "File" Menu. New Finder Window ⌘N New Folder ⇧⌘N Open With Close Window ⌘W Get Info ⌘I → untitled folder **❷** Switch the camera's power button to "Play", and connect the camera to the computer by using the USB cable provided. (For further details on connection methods, please refer to SOFTWARE INSTRUCTION AND USB CONNECTION GUIDE.) **❸** The "EVERIO_HDD" icon that stores the movie data will appear on the desktop (*1). Double click the icon to open it (*2). *1 Open "EVERIO_SD" for movies contained on an SD card. *2 Quickly click the button of the mouse using two successive movements.

❶

●Data storage section II Saving your movie on a DVD

All movies you make should be backed up on a DVD disc.

| Details	Method
Software Installation	The appropriate software is required for storing or editing your movie on DVD with your computer. (For further details regarding this, refer to the Install Section in the instruction manual.)
Starting the editing software	**❶** Open the "Macintosh HD" icon that is on the desktop.

❷

---

❹ Once "EVERIO_HDD" has opened, simply dragging (*1) "SD_VIDEO" and "EXTMOV" folders (*2) to the folder created in step 1 of page1.

SD_VIDEO

EXTMOV

*1 Move the mouse cursor to the desired location while holding down the mouse button.

*2 "SD_VIDEO" folder stores regular movie data. "EXTMOV" folder stores movie data that failed to be produced.
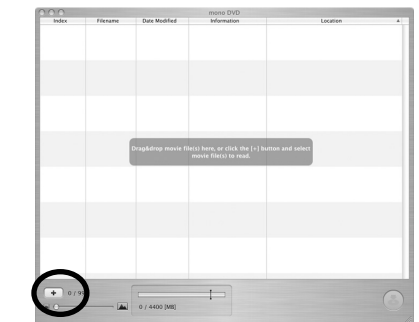

---

❷ Open the sidebar Applications icon.

❸ Open the "mono DVD for Everio" folder.

**❹** Double-clicking on the "mono DVD For EVERIO" icon will launch the software.

mono DVD for Everio

Loading the movie into the editing software
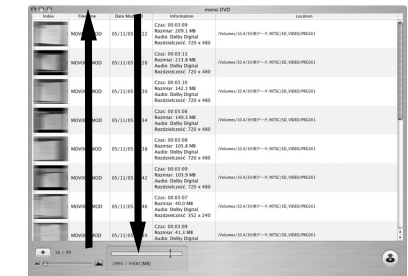

❶ 〔+〕 Click on the "read movie file" icon.

* You can also simply drag the movie file to the list screen.

❸

---

❷ Select the folder with the saved movie file and click "Open" to load the movie file (the movie file will be loaded into the list).

Arrange the movies order to be played

Drag the movie files in the list to arrange them in the order you want them to be played.

Removing unwanted files

Select the files you want to remove and click "Delete" from the "Edit" menu.

❹

Storing data on a DVD

*For further details on the types of DVDs that can be used, refer to the mono DVD Help (mono DVD operation guide).

❶ Click the 〔 〕 button.

❷ Inserting the DVD disc into the computer and clicking on "Burn" will start the creation of the DVD.

❸ When the DVD has been created, choose whether you wish to create another DVD.

●Choose "Create"
→Creates a DVD with the same contents.
Insert a new disc and click "Create Disc" again.
●Choose "Do Not Create"
→ Returns to the main screen.

*Note
A still frame may show up in between individual video files when played back with mono DVD for Everio.
Joining the files with MPEG Edit EX for Everio beforehand is recommended.
See the "Create a Story" section in the Macintosh version for more information.

❺

Use your own directorial talents to create a unique and dramatic scenario.

| Details	Method

※1
※2

❸ Give the file a name, choose a save location and click the "Save" button.

Save File

Save As: Untitled .mpg
Where: Desktop

The dramatic movies you create are your own works of art. Save them to DVD to be enjoyed over and over again.

* Follow the same instructions presented in "Data storage section II: Saving your movie on a DVD on pages 2 to 5.

Create masterpieces filled with loving memories of your family! Your family will be delighted!
You can even create another DVD and send it to grandma.

Now even you can create your own dramatic movies

● Additional information

Even without using a computer, it is also possible to edit movies by using the camera directly. The advantage of using Everio cameras is in their ability to function as a mini-editing suite, allowing basic editing functions such as erasing unwanted movies and rearranging selected pictures. The edited data can be copied to your computer at a later date.

For further information, please refer to in-sturuction manual

Creating wore attractive DVDs
PIXELA's 'CaptyDVD/VCD Ver.2' is recommended for creating DVDs. From CaptyDVD/VCD Ver.2.
● There is no image quality degradation due to editing.
● Wide-screen video is supported.
● Video files in the Everio hard disk can be used without conversion.
