LCD
GENESSA

Experience Resolution that Rivals Reality™ only from JVC Full HD 1080p

• **42 Inch Widescreen (1920x1080) Full HD LCD** – This 1080p panel features the highest available resolution for a picture with over 2 million dots.

• **No Hassle HD Picture** – The ATSC/Digital Cable input makes connecting to an HD signal a breeze. A built-in ATSC tuner allows you to receive over-the-air digital terrestrial broadcasts. The Clear QAM tuner allows you to receive unscrambled Digital Cable signals.

• **Dual HDMI v1.3 Inputs** – the latest version of the HDMI specification allows for the seamless connection of Blu-ray Disc and HD-DVD players with 1080p outputs.

• **32bit GENESSA Image Processor w/D.I.S.T. 1080p** – The D.I.S.T. engine (Digital Image Scaling Technology) is a unique I/P scaler that upconverts all signals to display at 1080p. JVC's GENESSA, a dedicated 32bit turbo powered CPU, combines all of our core image processing circuits together in a

single chip that allows for faster communication between circuits, including:

- ✓ Motion Adaptive Dynamic Gamma Correction;
- ✓ MPEG Noise Suppression;
- ✓ 3D Y/C Digital Comb Filter w/Digital VNR;
- ✓ Black Level Expansion;
- ✓ Natural Cinema (3-2 Pull Down); and
- ✓ 5 Point Color Management System (CMS) –

JVC color is superior thanks to GENESSA's advanced CMS. Only JVC compensates for 5 points of color range limitations to insure colors are reproduced with dimension and vivid detail — colors are always true and never tainted by surrounding or similar colors.

• **Sound Features** –

- ✓ 20 Watts Total Audio Power
- ✓ Twin Oblique Cone Speakers
- ✓ Advanced Hyper Surround
- ✓ Volume Limit/Turn On Volume
- ✓ Smart Sound
