A bout The Software Guide

This guide explains how to use "Everio MediaBrowser" (referred to as "MediaBrowser").

- This guide does not mention basic operations of Windows Operating System. Menu selection and window operations are based on general operation procedures of Windows Operating System.
- It is prohibited to reproduce the content of this guide, fully or partially, without notice.
- The content of this guide may be modified without notice.
- Please contact our User Support Center if you have any question.
- Illustrations in this guide show screen captures of the software under development. They may be different from the actual software.

Symbols Used in This Guide

This guide uses the following symbols.

This symbol indicates a reference page relating to the topics.

This symbol indicates important notice for operations.

This symbol indicates a useful hint for operations .

Trademarks

- MediaBrowser[™] is a trademark of PIXELA CORPORATION.
- Windows® is a registered trademark of Microsoft Corporation in the U.S.A. and other countries.
- The official name of Windows is Microsoft® Windows®.
- Manufactured under license from Dolby Laboratories."Dolby" and the double-D symbol are trademarks of Dolby Laboratories.
- iPod®, iTunes® are the trademarks of Apple Inc.
- YouTube[™] and "YouTube" logo are trademarks and registered trandemarks of YouTube LLC.
- Google[™] is the trademarks of Google Inc.
- The company names and brand names referred to in this instruction manual are themselves the trademarks, registered trademarks, and products of the respective companies.
- The [®] and [™] marks have been omitted in this instruction maual.

Before Using MediaBrowser

Cautions

- If recorded and/or edited content includes copyrighted works created by third parties, be sure to use them for personal use.
- Use an AC adaptor for the notebook computer power supply.
- Use an AC adaptor for the camcorder power supply.
- Connect the camcorder and the computer directly with an USB cable. Operation using USB hubs is not guaranteed.
- Do not put computer in Standby mode when a camcorder is connected.
- You cannot overwrite recorded DVD-R, DVD+R, DVD-R DL and DVD+R DL discs. When using a rewritable disc, erase the recorded data with "MediaBrowser" before writing.
- Do not to operate other software during disc writing.

About Supported Data

- With "MediaBrowser", you can use videos recorded with a JVC camcorder with which "MediaBrowser" is bundled.
- Audio files are not supported.

Operating Limitations

- "MediaBrowser" does not support Unicode.
- Even if video recordings are in a supported format, you may not be able to use them depending on the recording method.
- You cannot use "MediaBrowser" when connecting two or more camcorders to the computer.

- System folders, Windows-only folders, the root directory C:\ and optical drives cannot be selected as the saving destination for the Library and file export. For details about the Library, refer to P. 48.
- You cannot add files to the Library by drag and drop in "Explorer" from removable disks. For details about the Library, refer to P. 48.
- Exporting files after editing or converting with "MediaBrowser", the picture quality of the movie will be lower than the original.
- Playback on all players is not supported for discs created with "MediaBrowser".
- "MediaBrowser" may not operate correctly when a writing software other than "MediaBrowser" is installed. In this case, we recommend not to use multiple disc writing software at the same time.
- When erasing data on a rewritable disc, the progress bar may not be displayed correctly in some drives.
- Refer to the following website for the latest information about operating limitations. http://www.pixela.co.jp/oem/jvc/e/

P reparation

Starting and Exiting

Starting

You can start "MediaBrowser" in any of the following ways:

• Connect the camcorder.

"MediaBrowser" starts automatically when the camcorder is connected and a menu item is selected.

• Start from the shortcut icon.

Double-click the shortcut icon on the Desktop.

• Start from the [Start] menu.

Select the [Start] menu-[All Programs]-[PIXELA]-[Everio MediaBrowser]-[Everio MediaBrowser].

"MediaBrowser" browser screen will be displayed.

For details about Browser screen, refer to (P. 47).

Exiting

 $\ensuremath{\,\times\,}$ Close all dialog boxes and setting screens before exiting.

Windows XP

Windows Vista

	x

Connecting/Disconnecting the Camcorder

If the camcorder is disconnected from the computer while using "MediaBrowser", video files in the camcorder may be damaged. Follow the instructions below when disconnecting the camcorder from the computer.

- Use an AC adaptor for the camcorder power supply.
- Connect the camcorder and the computer with a USB cable. Operation using USB hub is not guaranteed.
- When disconnecting USB cable, click "Safety remove USB Mass Storage Device" icon
 (XP) / w (Vista))to release camcorder connection.

Connecting the Camcorder

- . Connect camcorder to wall outlet using AC adaptor.
- **2.** Turn on the camcorder.
- **3.** Connect the camcorder and computer with a USB cable.
 - ➡ Selection screen appears on your camcorder.
- **4.** Select a connection to computer in the menu of the camcorder screen.
 - Гал
- "MediaBrowser" browser screen will be displayed.

For operations of camcorder, please refer to the camcorder instruction manual.

Disconnecting the Camcorder

2. Click [Safely remove Mass Storage Device -Drive(X:)].

The letter that appears as "Drive (X:)" varies depending on the computer.
If multiple choices are displayed, select the drive corresponding to the camcorder.

A message informing you it is safe to remove hardware will be displayed.

3. Disconnect camcorder.

W hat You Can Do with MediaBrowser

"MediaBrowser" expands the use of videos recorded with your camcorder. You can just follow the instructions on the screen to use the functions.

- Write on Discs
- Save on the Computer
- Export to iTunes
- Upload to YouTube
- Playback Videos
- Manage Videos
- Edit Videos

Using Videos Stored in Camcorder

You can write videos in the camcorder directly to a disc, or save videos to computer more easily by selecting menus on camcorder screen.

W hat you can do with the camcorder connected

"MediaBrowser" expands the use of videos recorded with your camcorder. You can just follow the instructions on the screen to use the functions.

Store Videos

Saving on a disc

Connect your camcorder and press [DIRECT DVD] on camcorder to create a DVD-Video disc with simple operation.

For details, refer to "Write Videos onto Discs"(P. 18).

• Saving on the Computer

Save videos in computer and you can create DVD-Video discs and edit movies anytime.

For details, refer to "Save Videos to Computer"(P. 23).

Convert Videos for iTunes or YouTube

You can walk around with the recorded videos on your iPod, or share them on YouTube.

Export to iTunes

Video data is converted for iPod and automatically added to "iTunes".

For details, refer to "Export Videos to iTunes"(P. 26).

Upload to YouTube

Enter "YouTube" account information, and converted videos can be uploaded automatically.

For details, refer to "Upload Videos to YouTube"(P. 30).

Playback Videos in the Camcorder

"What is this video...?" Preview function will help you check the videos in times like this.

You can play back the videos stored in the camcorder by connecting your camcorder and the computer.

For details, refer to "Check Video Contents"(P. 34).

Using Videos Stored in Camcorder

Write Videos onto Discs

Writing All Videos onto Discs(Direct DVD)

Create DVD-Video disc that you can playback on a DVD player. Settings such as menu screen creation are done automatically and you can create DVD-Video discs without operating computer much.

* Video files already written before with the direct DVD function will not be written.

X Close screens such as Explorer.

2. Connect the camcorder to the computer.

3. Press [DIRECT DVD] button on the camcorder.

"MediaBrowser" Direct Disc screen will be displayed and disc creation will be started.

- X If "Set a new disc" message appears, set a disc in a drive. Up to 5 discs can be created in one operation.
- Created DVD can be played back on a DVD player.

Data on the disc will be erased. If erasing is canceled, disc creation is canceled.

Selecting Videos and Writing onto Discs

You can select videos in the camcorder's recording media and create a DVD-Video disc.

Set a DVD to write to in the drive.

* Close screens such as Explorer.

2. Connect the camcorder to the computer.

3. Select [CREATE DVD] in the camcorder menu.

The disc creation screen of the "MediaBrowser" will be displayed.

Step1 : Select candidates individually

4. Drag & drop the file(s) to write on a disc to the bottom half of the screen.

When videos you do not wish to write to disc are included Select the video file and click [Deselect].

Using Videos Stored in Camcorder 2 dia Browser

6. Check the disc creation settings and click [OK].

Disc Creation Settings		X

		ОК	Cancel]

1 Workspace

Set a place for the MediaBrowser workspace used when editing movies or creating discs. A volume with most free space is selected as default. Volumes which you may not write to will not be displayed.

2 Library destination settings

Set two locations to save Library contents.

• Primary destination: Files are saved until all the free space is used in this location.

[Everio MediaBrowser] folder in the [My Video]/[Video] folder ([My Document] folder if [My Video] folder does not exist) is set as default.

※ Do not delete the original destination folder after you change the Library destination. The new Library destination will only contain files that you are going to add to the Library after the change.

Using Videos Stored in Computer

DediaBrowser

- Destination: Files are saved in this location when there is no space in Primary destination.
- Switch destinations : Click to switch the Primary destination and the destination.

3 Reset all Imported Marks

Click [Reset] if you want to reset all the Imported marks (P. 52).

4 Video System

Select the video system when creating a disc or exporting files in a different format.

5 Beginning of Week

You can select between Sunday and Monday to display on the left in Calendar view.

Preview Screen

Double-click a video file and the screen appears.

[Finish playback] button

Quits playback and returns to the browser screen.

What's Library?

The Library is a place where all the video files used in "MediaBrowser" are stored. All saved videos are managed in the Library.

Library and Lists

The Library is a place where all the video files used in "MediaBrowser" are stored. A list is used to group videos with a common theme. You can create multiple lists and sort the videos in the Library according to your preferences.

Videos added to a list do not move to the list but remain in the Library. Lists are just a convenient way for organizing and displaying videos that share a common theme.

Adding Videos to the Library

Adding Videos in the Camcorder

Add videos in camcorder connected to computer to the Library.

Select the camcorder in the Source pane.

2. Click [Backup].

63

Step1 : Volume Selection

 $\mathbf{3}$. Select the volume where video file(s) you wish to save to the computer exist.

4. Click [Next].

Step2 : Confirm

5. Check the content and click [Start].

Using Videos Stored in Computer

DediaBrowser

➡ The file is added to the Library.

You can also add files/folders to the Library by drag & drop. In "Explorer", open the folder containing the video file or folder you wish to add and drag & drop to the browser screen.

※ It is not possible to drag & drop from removable disks.

Handling the files added to the Library

"MediaBrowser" cannot find files if, for example, the files are deleted in "Explorer" after being added to the Library. Do not delete or move the video files you use in "MediaBrowser".

If you are using removable medias such as a USB memory, save the video files to the computer in advance, before adding them to the Library.

About files in camcorder

Selecting files in camcorder in file selection dialog will only add the link information and not copy the files themselves. Added files become un-usable if you disconnect or initialize camcorder.

To add video files in camcorder to the Library, refer to "Save Videos to Computer" (P. 23).

Checking Video Contents

Viewing Videos in List

Using Videos Stored in Computer

Addia Browser

To select View Options for video files

To change View Options, select [Show View Options...] in the [Window] menu, and set the options you want to display.

Note that the file status and title cannot be hidden.

To change the thumbnail size

You can change the thumbnail size by dragging the line between the item headings [Thumbnail] and [Title] in the browser pane.

Checking Information of a Video File

Video file playback time, file formats and other details can be displayed and previewed.

]. Select a list the video file is contained and select the video file.

Playback will be started and video files in the selected list are played in sequence.

Double-click the video area to go back to original screen from full screen.

Organize Videos

When the number of files in the Library is increased, create lists for easy file search.

Differences between User Lists and Smart Lists

When you have a large number of video files in "MediaBrowser" and handling them becomes difficult, organizing files can be made easier by creating Lists by theme or any other category you prefer. There are two types of Lists you can create with "MediaBrowser": regular User List and Smart List.

User List

"User List" is a any collection of video files you like, just as a photo album.

For example, if you create an List "Birthday party", you can select and add video files related to the birthday party manually to that List. Then, you can play back the video files in sequence when you want to watch the birthday party videos, or create a disc from the List.

Smart List

"Smart List" collects video files automatically, using the electronic data characteristics. When you set a the rules for the Smart List, video files that match the criteria are collected automatically.

For example, if you create a Smart List "April 2008" with the criteria "Videos recorded in April 2008", all video files recorded on the specified date are added automatically.

Creating a List by Collecting Favorite Video Files

Storing Videos

119

Troubleshooting

I want to create a DVD with contents I already saved to DVD once.

Once you created a DVD using Direct DVD, data is labeled as written on camcorder, and cannot be saved on DVD.

* You can save files in computer and create a DVD-Video disc.

120

Can I create a DVD with DIRECT DVD using contents I saved to computer once?

You can save onto DVD with contents not used in Direct DVD before. Files already used for DVD creation once cannot be saved.

Others

I can't exit "MediaBrowser".

Close all dialog boxes and setting screens before exiting.

Video files are not displayed.

If they actually exist but not displayed in the browser pane, check if the view is filtered. Click [
