The Perfect Experience / —

## UX-J51

PREMIUM MICRO SYSTEM

## HIGH PERFORMANCE

The UX-J51 is a fully digital system that performs digital processing from the input to output stages.

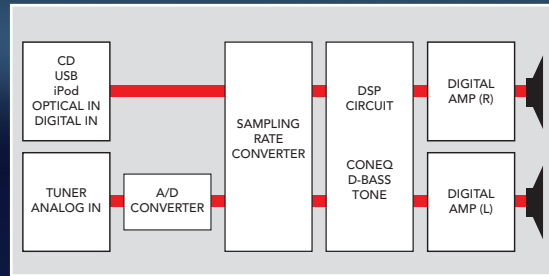

It is equipped with an iPod digital connection dock that transmits music data in digital format for superior sound reproduction. For other digital sources, USB Host is also provided.

A two-way speaker design with a soft dome tweeter insures quality sound.

## PREMIUM SOUND QUALITY

- High Precision "Full-Digital" Processor
- Individual L/R Channel Mono Amplifiers
- 40 Watts Per Channel (80W total)
- Two-Way Bass Reflex Speakers
- Soft Dome Tweeters
- High Quality Crossover Network

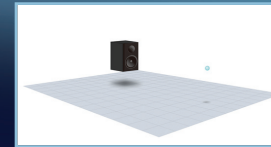

Internal Circuitry

# CONEQ™

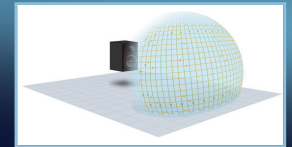

## Acoustic Power Equalization Technology

World first sound power technology that uses 400 points of measurement to reproduce more natural and realistic live performances.

CONEQ (Convolution Equalizer) equalizes the acoustic power of a speaker and improves performance. It eliminates "sweet spots" and "dead spots" effectively unifying sound throughout the room.
