Precautions for Quad Proof Function

- Malfunction due to misuse by the customer is not covered by warranty.
- Before use in water, be sure to read the "Detailed User Guide" in the built-in memory of the camcorder.
- Close the connector cover firmly until it clicks and confirm that the red sign completely goes off.
- Make sure that there is no damage to and no foreign material adhered to the packing inside the cover.
- Use the camcorder in marine water and fresh water not deeper than 5m/16.4ft and for not more than 30 minutes.
- The waterproof cannot be guaranteed if the camcorder is subject to impact such as dropping.
- Do not apply impact in water.
- Do not soak the camcorder in hot springs or water of 40°C/104°F or higher.
- Dustproof function is not meant to encourage use on sand. Avoid use in conditions where sand and/ or dust particles can become lodged in moving parts such as the LCD monitor hinge and zoom lever.
- Temperatures between 0°C/32°F and -10°C/14°F temporarily lower battery performance, reducing the time available for recording.
- Quad Proof is not a guarantee of protection against damage and malfunction.

LONG LIFE

QUAD PROOF

Everio

The power to keep going, whether it's raining or snowing.

The combination of JVC's Quad-Proof Design and Long-Life Battery provide protection against bad weather and bad luck. Now you can keep recording excellent footage in environments that are far from ideal.

5m/16.4ft Waterproof

Whether you drop it into water or dive with it, IPX8 certified waterproofing keeps Everio running.

Dustproof

IP5X certified dustproofing lets you use Everio in some seriously dusty environments without worry.

1.5m/4.9ft Shockproof

Accidental droppage can destroy an ordinary camcorder, but Everio is built tough to take it in stride.

-10°C/14°F Freezeproof

Take Everio out in the snow or on the slopes – even if you're freezing, Everio will keep working.

4.5H¹ Internal Long-Life Battery

Shoot entire events, with no risk of damage by changing the battery in bad weather.

Compatible with Portable Battery² and USB Charging
Additional power wherever you are.

¹ 4.5H is the approximate time of continuous recording if the internal battery has been fully charged, when the LED light (if available) is off, the monitor backlight is set to standard mode, and without the use of zoom function.
